SHARED WORK PROGRAM: The Shared Work Unemployment Compensation Program is an alternative to layoffs for employers faced with the reduction in available work. It allows an employer to divide the available work among a specified group of affected employees instead of a layoff. These employees receive a portion of their unemployment benefits while working reduced hours. To participate, an employer must complete an application for the affected unit within the company, and submit it to the Division of Employment Security (DES) for approval:

Mass Claims Filing: Employee information provided by the employer, allows the Division of Employment Security (DES) to file an initial or renewed unemployment claim on behalf of employees quickly and efficiently.
